

All Pet Stop® Transmitters and Receivers operate on Digital Technology (DM) -
This digital framework eliminates interference due to it's ability for numerous settings. Unlike other pet containment systems that use an AM or FM frequency, DM ensures a tight digital code which delivers the precise intended leaving no "holes" or "false " corrections on your pet fence.

Dog Containment Designs and Layouts

Pet Containment Perimeter Layout

Pet Containment Hourglass Layout

Pet Containment Backyard Double Loop Layout

These are by far the most common layouts; every installation we do is some variation of one of these three.
